1970-81 Energy Use - Department of Transportation, Civil Aeronautics Board, Fuel Cost and Consumption, Washington, DC, 1981, and annual.

1982-96 Energy Use - Department of Transportation, Research and Special Programs Administration, "Fuel Cost and Consumption Tables," Washington, DC, monthly. Annual totals are derived by summing monthly totals for domestic and international air carriers. (Additional resources: http://www.fss.gov, http://www.fss.gov)

^aScheduled services of domestic operations only. The average passenger trip length for international operations is more than three and a half times longer than for domestic operations.

^bAvailable seats per aircraft is calculated as the ratio of available seat-miles to revenue aircraft-miles.

^{*}Passenger load factor is calculated as the ratio of revenue passenger-miles to available seat-miles for scheduled and nonscheduled services.

dEnergy use includes fuel purchased abroad for international flights.

Scheduled services only.

Data are not available.

^aActive fixed-wing general aviation aircraft only.

^bInclude rotocraft.

In the early seventies, domestic waterborne commerce accounted for over 60% of total tonnage, but by 1996 foreign tonnage grew to more than half of all waterborne tonnage.

^bAll movements between U.S. ports, continental and noncontiguous, and on the inland rivers, canals, and connecting channels of the U.S., Puerto Rico, and the Virgin Islands, excluding the Panama Canal. ^cBeginning in 1996, fish was excluded for internal and intra port domestic traffic.

^aAll movements between the U.S. and foreign countries and between Puerto Rico and the Virgin Islands and foreign countries are classified as foreign trade.

Number of vessels -

1970-92, 1995-96 - U.S. Department of the Army, Corps of Engineers, "Summary of U.S. Flag Passenger and cargo vessels, 1996," New Orleans, LA, 1998, and annual.

1993–94 - U.S. Dept of the Army, Corps of Engineers, *The U.S. Waterway System-Facts*, Navigation Data Center, New Orleans, Louisiana, January 1996.

Ton-miles, tons shipped, average length of haul - U.S. Department of the Army, Corps of Engineers, Waterborne Commerce of the United States, Calendar Year 1996, Part 5: National Summaries, New Orleans, LA, 1997, Table 1-4, pp. 1-6, 1-7, and annual.

Energy use - See Appendix A for Table 2.7.

(Additional resources: http://www.wrc-ndc.usace.army.mil/ndc)

^bThese figures are not consistent with the figures on Table 6.4 because intra-territory tons are not included in this table. Intra-territory traffic is traffic between ports in Puerto Rico and the Virgin Islands.

^aGrand total for self-propelled and non-self-propelled.

Fifty-seven percent of all domestic marine cargo in 1996 were energy-related products (petroleum, coal, coke). The majority of the energy-related products were shipped internally and locally (62%). Barge traffic accounted for 96% of all internal and local waterborne commerce.

(Additional resources: http://www.wrc-ndc.usace.army.mil/ndc)

Note:

Coastwise applies to domestic traffic receiving a carriage over the ocean or between the Great Lakes ports and seacoast ports when having a carriage over the ocean.

Lakewise applies to traffic between United States ports on the Great Lakes. Internal applies to traffic between ports or landings wherein the entire movement takes place on inland waterways. Local applies to movements of freight within the confines of a port.

^aDoes not include intra-territory tons.

^bCalculated as ton-miles divided by tons shipped.

^cNegligible.

The Interstate Commerce Commission designates Class I railroads on the basis of annual gross revenues. In 1996, ten railroads were given this classification (see note below).

Table 11.6 Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1996

Railroad	Revenue ton-miles (billions)	Percent
Burlington Northern and Sante Fe Railway Company	411	30.3%
Union Pacific Railroad Company	333	24.6%
CSX Transportation	157	11.6%
Southern Pacific Transportation Company	156	11.5%
Norfolk Southern Corporation	130	9.6%
Consolidated Rail Corporation (Conrail)	95	7.0%
Soo Line Railroad Company	25	1.8%
Illinois Central Railroad Company	22	1.6%
Kansas City Southern Railway Company	18	1.3%
Grand Trunk Western Railroad Inc.	9	0.7%
Total	1,356	100.0%

^aDoes not include self-powered units. From 1972 to 1979, the number of locomotives used in Amtrak passenger operations are subtracted from the total locomotives used in passenger and freight service to calculate the number of Class I locomotives in service.

^bDoes not include private or shipper-owned cars.

^cTons originated is a more accurate representation of total tonnage than revenue tons. Revenue tons often produces double-counting of loads switched between rail companies.

^dData represent total locomotives used in freight and passenger service. Separate estimates are not available.

The "other" category, which consists primarily of intermodal traffic, has grown 86% in carloads from 1974 to 1996. Coal continues to account for one quarter of all carloads.

Table 11.8

(Additional resources: http://www.aar.org)

The number of trailers and containers moved by railroads has increased more than four-fold from 1965 to 1996. Containerization has increased in recent years, evidenced by the 52% increase in the number of containers from 1988 to 1996.

^a Data are not available.

^b Energy use for 1994 on is not directly comparable to earlier years. Some commuter rail energy use may have been inadvertently included in earlier years.

^c Estimated using train-miles.

^d Average annual percentage change is from earliest year available to 1996.

Year	Number of passenger vehicles	Vehicle-miles (millions)	Passenger trips (millions) ^b	Estimated passenger-miles (millions) ^c	Average trip length (miles) ^d	Energy intensity (Btu/passenger-mile)°	Energy use (trillion Btu

Energy use - See Appendix A for Table 2.7.

aSeries not continuous between 1983 and 1984 because of a change in data source by the American Public Transit Association (APTA). Beginning in 1984, data provided by APTA are taken from mandatory reports filed with the Urban Mass Transit Administration (UMTA). Data for prior years were provided on a voluntary basis by APTA members and expanded statistically.

b1970-79 data represents total passenger rides; after 1979, data represents unlinked pasenger trips.

Estimated for years 1970-76 based on an average trip length of 5.8 miles.

⁴Calculated as the ratio of passenger-miles to passenger trips.

^eLarge system-to-system variations exist within this category.

Data are not available.

⁸Average annual percentage change is calculated for years 1977-96.
